# MARKET ANIMAL PERFORMANCE

**This page is ONLY for Market Animal projects (Beef, Goat, Poultry, Rabbit, Sheep, Swine & Turkey)**

Record N/A in the Project box if you are not in one of these market projects.

Record your market animal weights and track your animal's performance during the project by determining Average Daily Gain (ADG) regularly. This will help you to assess your feeding so you can reach market weights for fair. At the end of the year, calculate your Total Average Daily Gain and reflect on how well your feeding program helped your animal prepare for market.

**Complete a market animal performance page for EACH MARKET ANIMAL OR GROUP OF ANIMALS FED ALIKE.**

Record weights in pounds. Rabbits and poultry weights can be in ounces.

See Record Book Guide for help with Market Animal Performance.

Project:		Animal(s) ID:		
Weigh Date	A) Weight	B) Weight Gained (current A - previous A)	C) Number of Days Since Last Weight	Average Daily Gain (ADG) (B / C)
		***Beginning weight, you do not need to fill out the rest of this line***		
<b>D) TOTAL WEIGHT GAINED</b>				<b>E) TOTAL DAYS</b>

Enter the beginning weight (tagging weight) of your market animal(s) in the first row. Each time you weigh your animal(s), enter this in the next row and determine the ADG. More lines can be added as needed. At the end of your project, calculate a total ADG at the bottom. Complete a self evaluation on your market project based on these results to determine whether you want to feed your animal(s) the same next year. **For directions on how to get weights without a scale, click on this link below:**
